JFK Library goes Digital!

A new John F. Kennedy Digital Archive, at: <http://www.jfklibrary.org/> has been launched.

At the archive you can explore the documents, images, artifacts, speech transcripts and video(s) of JFK's Presidency.

You can also follow each of JFK's 1,000 days in office through a feature called 'Interactive White House Diary.'

The JFK Library also boasts the world's largest collection of Ernest Hemingway archived materials.

Info: JOHN F. KENNEDY PRESIDENTIAL LIBRARY AND MUSEUM, Columbia Point, Boston MA 02125
Tel: (617) 514-1600.

Note: **As a young at-home mother, I was watching John & Jackie Kennedy's motorcade in Dallas, TX on that fateful day of his assassination, 50 years ago.**

What **Las Vegas** is to the Nation, **CES** is to Las Vegas, and **ShowStoppers** is to **CES**. This invitation-only technology showcase for analysts, bloggers and journalists always takes place at the **Wynn Hotel** during the week of the Int'l Consumer Electronics Show [CES].

Only at **ShowStoppers** do I experience the opportunity to have meaningful exchanges with exhibitors both well-known and unknown, who are more than willing to dispense information, tokens, momentos, and gifts....and, did I mention the food?!

Dave Graveline, broadcasting his popular Internet Radio TechNews show, '**Into Tomorrow**' was a familiar presence. Dave initiated the concept of a high tech talk show with '**Toys for Boys**' in 1996, two years after I founded **Digital Times®**.

Located in Berlin, Germany, **IFA** is the world's largest consumer electronics show & **ShowStoppers** is the official press event at **IFA**. I will forever associate the **IFA** with Pink Floyd's '**Dark Side Of The Moon**' as the dramatic music from that album was piped throughout the show when I attended **IFA** in 1977!

IFA's 2011 event takes place September 7-9. The show looks very exciting and will feature Keynotes, **IFA TecWatch**, **iZone & eLibrary**, **Home & Audio Entertainment**, **Home Appliances**, **Media** both private and public, **Communication**, **Technology & Components** & more... **IFA** details [HERE](#).

My reporter and I happened to meet a mother & daughter team of inventors who conceived of **Agloves**, a touch screen capacitive glove with conductive silver-coated-nylon fibers especially developed for use in *cold weather*. This new product rolled out in *September, 2010*.

Agloves won a coveted **CES Innovations Award** and *plans to exhibit* at ShowStoppers next year! . I received my **Agloves** in the mail and thank you, Jean and Jennifer Spencer of Boulder, Colorado; *you have my sincere congratulations!*

Skydiving Into CES -- BodyMedia's CTO Ivo Stivorc, intern Nic Wilson, and 7 other jumpers dove out of a plane at an altitude of 12,000 ft, drifted into normally restricted airspace over the 'Las Vegas Strip' and landed near the entrance to the Las Vegas Convention Center to unofficially 'open' the show! They were wearing he newest and most advanced generation of body monitoring systems, The Armband BW.

Here is the **VIDEO** of their epic skydive:

ShowStoppers

Karotz

These little guys were a big hit at the show. The target MARKET is young adults to age 35,

per the marketing rep I talked to. Why? Because they are so *complicated*. The base unit uses voice recognition, surfs the Internet, sorts, selects and reads your emails as well as the Facebook status of your friends. It reads your TWEETS. You can talk to it, link up with it and chat.

It has an integrated, built-in microphone & webcam, angle control, LED, RFID reader, Speaker, Wi-Fi Antenna, Battery, Volume Control, USB port & Mini USB port. Options include a USB tail, Ethernet adapter, Skinz [travel, tatoos, sports], a Family Quizz, Music Pack, & Organizer.with 4 Flatnanoz.

The little guys in the foreground are called Earz. The basic Karotz unit includes 2.Flatnanoz. You can marry your Flatnanoz to other Flatnanozes [is that a word?] With Karotz's webcam, you can see on your computer or smartphone what Karotz sees, so its a mini security device ;~) **KAROTZ**
